The Axiomatics Review Manager enables administrators, managers, auditors and compliance officers to create access control reports for review purposes in various contexts, such as an annual check, or frequent compliance and audit checks.

KEY FEATURES
- Full integration with Axiomatics Policy Server (APS) and Axiomatics Data Access Filter (ADAF).
- Stores all questions for future use.
- Allows administrators to create tailored question templates for use by other staff.
- Existing queries can be re-run at any time.
- Creates easy-to-understand reports.
- Supports XACML 3.0.

PROVE ABAC POLICY ENFORCEMENT
The Axiomatics Review Manager enables administrators, managers, auditors and compliance officers to create access control reports for review purposes in various contexts, such as an annual check, or frequent compliance and audit checks.

Administrators or developers design templates that enable other authorized users to generate reports on ABAC related access control questions. Once a query is posed, the Review Manager then generates a list of the conditions in which the question posed can occur. In this way it is possible to prove that regulations are being complied with. Typical questions that can be asked include:
- Under which conditions can Sensitive data be accessed?
- Under what conditions can a trader approve a trade order?
- What are the conditions under which the financial details of a politically exposed person can be viewed?
OPERATING SYSTEMS
- Windows Server 2008 R2, 2012
- CentOS 5, 6, 7
- Redhat Enterprise Linux 5, 6, 7
- Ubuntu Server 12.04 LTS, 14.04 LTS
- SUSE Linux Enterprise Server 11, 12

DATABASES
- PostgreSQL 9
- Oracle 11g, 12c
- DB2 9.7, 10.1, 10.5

APPLICATION SERVERS
- Tomcat 7 or 8
- 64-bit WAS or WAS ND 7.x, 8.0 or 8.5 (with IBM Java 6)

JAVA RUNTIME ENVIRONMENTS
- Oracle Java 7 or 8 JDK 64 bit

WEB BROWSERS
- Firefox 42.x
- Chrome 46.x
- Internet Explorer 10 or 11

DISK AND MEMORY
- Minimum memory: 2 GB
- Recommended memory: 4 GB
- Minimum disk space: 900 MB
- Recommended disk space: 2 GB

PRODUCT INTEGRATION
- Axiomatics Policy Server 6.1.x, 6.2.x
